PRINCIPAL

From the Principal's Desk

It gives me great pleasure to bring this edition of the college newsletter to you. Academic excellence is what we aim for and we have big plans afoot to achieve it! All the activities conducted across different domains clearly indicate that the college is progressing in the right direction.

Creating better human beings is our motto. Education is not the act of acquiring knowledge through books alone, it is also the act of transforming students into responsible citizens. Our focus is to empower students with sound knowledge, wisdom, and experience at the academic level and in the highly competitive global industrial market. To make the students industry ready, the institution seeks to impart both soft and professional skills to them through its unique approach to education.

I can say without a doubt that we have exceeded expectations in each activity that we embraced and we have stood together in facing the challenges in realizing quality education. We trust that achievement is unavoidable with foresightedness, firm assurance, hard work and discipline.
